

Continuing our Explorer Badge work on astronomy, we made a Stargazer which is a sort of telescope made out of a cardboard tube with an end cover pierced in the shape of a constellation. Looking through this, we can see the particular constellation but no other stars.

The following week, instead of a visit from the police, we had the Student CPR team who showed us how to resuscitate a person using their Resusi Annie doll. We then all had a try at CPR as you can see in the photo.

On the 19th march, in preparation for Mother's Day, we made a gift for our mothers. This involved covering a plant pot with decorated tissue paper, filling it with soil and planting anemones.

As the hut was being used to set up for the jumble sale, on 26th March we went to the Potting Shed where we painted plates with an Easter theme. These plates will be glazed and fired by people at the Potting Shed and we will get them in time for Easter. See our *Activities* page for some photos.

Activities in April - not to be missed

St Georges Day Activity

Thursday 23rd April

Visit to Lifeboat Station

Thursday 30th April
