

Visit to Hoylake Lifeboat Station

On 27th April, 22 Beavers visited the lifeboat station at Hoylake.

We were shown around the new station and the Lifeboat (Lady of Hilbre). One of the Lifeboat men put on his waterproof suit and explained about the different parts. He then inflated the life jacket to show us what it was like. Then we went into the training room and watched a Lifeboat DVD (BSL says she has never known the

Beavers so quiet). At the end we all had our photograph taken in front of the Mersey class Lifeboat and this will be on the Hoylake Lifeboat station web site.

During the visit we invested 4 Beavers.

Before we left we made a donation towards a replacement Lifeboat as the present one is now 19 years old.

Everybody enjoyed the evening.
